

## **Appendix 1 Listing of IAEP Program Schools**

(from the Institute of Internal Auditors web site,  
<http://www.theiia.org/guidance/academic-relations/internal-auditing-education-partnership-program/>)

The Internal Auditing Education Partnership (IAEP) program was developed to respond to the growing interest in internal audit education at institutions of higher learning. The IAEP program also addresses a general need of practitioners interested in hiring students who possess a well rounded skill set for conducting internal auditing.

The IAEP program prepares students with the skills and knowledge to help them conduct basic internal audits immediately upon hire as well as provide a foundation to begin preparing for the CIA<sup>®</sup> examination.

### **IAEP Framework**

To be successful, schools must have the ability and the resources necessary to support this effort. IAEP schools work closely with The IIA to develop meaningful internal audit curricula and assist other colleges and universities in establishing similar programs. The success of IAEP member schools demonstrates to other universities that internal audit education is worth the necessary commitment. The Framework was developed to provide guidance for existing IAEP programs and schools planning to apply to the program.

### **Program Requirements**

A successful program is a partnership with the school, IIA Chapter/Institute, and The IIA's Academic Relations Department. Each partner has a role in the sustainability of the school's program. Twice each year, The IIA's Academic Relations Committee (ARC) reviews applications from schools interested in becoming a member of the IAEP program. The ARC will consider applications from schools that:

- Demonstrate high potential and the aspiration to become leaders in internal audit education.
- Identify a faculty "champion" who will drive the IAEP program on campus as the coordinator including succession planning for the program.
- Provide support of the IAEP program from the department and school administration.
- Partner with a local IIA Chapter/Institute to obtain the optimal results for program success.
- Possess the determination to adhere to the program criteria.
- Are recognized in the business communities as quality schools from which to recruit internal audit talent.

***Centers for Internal Auditing Excellence (Centers)***

These IAEP programs are identified as teaching a curriculum within a college or university degree program that consists of a minimum of four courses related to the internal audit profession (as agreed to between the schools and ARC) and equates to a concentration, a minor or a major within a specific academic discipline. It also recognizes the quality, sustainability, volume of students completing the program and longevity of the program.

***Comprehensive Internal Auditing Program (Comprehensive)***

These IAEP programs are identified as teaching a curriculum within a college or university degree program that consists of three courses related to the internal audit profession (as agreed to between the schools and ARC) and equate to a concentration within a specific academic discipline.

***Internal Auditing Foundation (Foundation)***

Schools accepted into the IAEP programs that have been teaching at least two internal audit courses for a minimum of one year are designated as ***Foundation*** programs. This classification of IAEP program allows the school to pace itself as it develops and enhances its IAEP curriculum. Or it may choose to remain at this degree of commitment from the school.
